

Disaster Survival Seminar

What you need to know and do in your home, car or office before, during and after a disaster to increase your odds of survival.

Types of disasters and Action Plans for each.

How to harden your home to reduce risks.

Equipment and supplies to stock Now!

Disaster Life-Saving procedures.

Disaster First Aid procedures.

Aftermath survival skills.

This is a fast-paced, time-efficient, crash-course in what to do and not do when confronted with an area-wide disaster that overwhelms professional services and hospitals, leaving you with no one to turn to but yourself. You will learn life-saving skills through lecture and hands-on practice, and take home a Disaster Survival Guide that shows you what to do and how. Disasters covered include Earthquakes, Hurricanes and Tsunami, Tornados, Pandemics, Hazardous Materials accidents, and Nuclear events.

Our speaker will be Bill Pope. Bill trains civilian emergency response teams and is the author of the Civilian ER Team Field GuideBook. He has served on search & rescue teams, underwater search and recovery teams, and as a volunteer Wildland firefighter. He also helped send men to the moon.
